

Policy Title:	FIRST AID POLICY	ISI Policy number: 13a
Author:	The Head of Operations / Lead School Nurse	Checked by: The Head
Date of most recent review:	September 2024	
Date of next review:	September 2025	

This Policy applies to all sections of the School, including Early Years Foundation Stage (EYFS)

Aims:

Duke of Kent School places the highest priority on all matters of Health and Safety. All members of the community – pupils, staff or visitors - who feel unwell or who require First Aid will be treated in a timely and competent manner. This policy sets out the arrangements for First Aid at Duke of Kent School and has been written with reference to DfE ‘*Guidance on First Aid in Schools – a good practice guide*’ (2014), ‘*Supporting pupils at school with medical conditions*’ (2015), and the ‘*Statutory Framework for the Early Years Foundation Stage*’ (2021)

Definition:

First Aid is basic medical treatment administered as soon as possible after someone becomes unwell or has an accident. The First Aid procedures detailed in this policy exist to ensure that pupils, staff and visitors to Duke of Kent School will be well looked after in the event of illness or accident - major or minor. First Aid can save lives and can stop a minor incident from becoming a major one.

I. First Aid Arrangements:

- I.1 It is emphasised that the Duke of Kent School First Aid team is generally composed of a School Nurse (RGN) and First Aiders. The term ‘First Aider’ refers to members of staff who are in possession of a valid First Aid certificate or equivalent qualification.
- I.2 In the event of an accident all members of staff should be aware of the support and the procedures available. Staff should do their best to secure the welfare of an injured person in the way that a parent might be expected to act towards their own children.
- I.3 The provision of First Aid must be available at all times, including all off- site activities. In the case of pupils in the Early Years Foundation Stage, at least one member of staff with training in paediatric first aid will be present on all outings. First Aid kits are

available as required from designated locations or the Medical Room.

- 1.4 The School will provide training for those staff who volunteer to be First Aiders, including refresher courses (certificates are valid for three years). A list of First Aid trained members of staff is maintained by the School Nurse and is available in reception, in the medical room and in the staff room on the medical noticeboard.
- 1.5 The School Medical Room is located between the Old Hall and the Dining Hall. When it is not in use, a key is available from the key safe by the door to the cellar. Teaching staff can ring the medical room on 213 to ask the School Nurse to attend to a pupil, and pupils (Year 3 and above - Pre Prep pupils to be accompanied by a member of staff) are also welcome to attend the Medical Room when needed (they are encouraged to wait until break time if possible).
- 1.6 The Medical Room Team alerts teaching staff to pupils with medical conditions (for example epilepsy, diabetes, allergic reactions) at the beginning of term at INSET. It is also the responsibility of staff to keep up to date with pupil's medical conditions by checking the School's "Pupil Medical Conditions" files on the Staff Google Drive. (Staff are reminded by the Lead School Nurse, that medical information is shared on a "needs to know basis" and that medical confidentiality should be maintained). The School Nurses also maintain a record of pupil medical conditions on the "Medical Centre" section of iSAMS, accessible primarily by them, and hard copies of medical documentation specific to students are kept in named files within the locked filing cabinets in the Medical Room. Photographic notices identifying pupils with significant health conditions are displayed within the staff room away from public view. The kitchen staff maintain a photographic "think of me" board, recording students with known allergies (as advised by the Lead School Nurse). This is displayed in an area visible only by kitchen staff and not within public view.

2. Named First Aiders and Qualifications/Locations of First Aid supplies:

Please see **Appendix A** at the end of this policy for the up to date list of first aid qualified members of staff. A list can also be found in the Staff room, on the Medical Room door, and in Reception.

2.1 Where to Find First Aid

If the Medical Room is unmanned, pupils, visitors or staff can summon assistance by using the walkie-talkie outside the room during School Nurse hours. In an emergency situation, or out of School Nurse hours, pupils, visitors, or staff should report to Reception or the Main School Office.

2.2 Location of First Aid Boxes

A first aid box is accessible at all times and there is a first aid box close to all EYFS classrooms and boxes can be found in the following locations; Medical Room, Sports Hall, Staff Room, Performing Arts Hall, Music Department Staff Room, DT Room, Art Room, Science Labs, Minibuses, Grounds Office, Grounds vehicle, Pre-Prep corridor, Prep Corridor, Kitchen and Swimming Pool. Mobile kits are to be taken for all off-site activities along with individual pupil emergency medication usually stored in "red bags" such as adrenaline pens and

inhalers (these should be collected from the Medical Room along with mobile First Aid kits).

- 2.3 There are two Automated External Defibrillator units (AED) available. The first is situated in the Reception Office of the School, and the second in the foyer of Ness Hall (sports hall). The Medical Room Team will be responsible for the weekly check and maintenance of all the equipment during term time. During School holidays, the Bursary/Office staff will be responsible for the checks. For further information, please see AED Policy and checklist held by the Medical Room Team.

3. Protocol for Sick/Injured Child/Adult

- 3.1 If a child or adult is hurt or feels ill he or she should attend the Medical Room. If a member of the Medical Room Team is not present then assistance can be summoned by using the walkie-talkie (located outside the Medical Room), or out of School Nurse hours, help should be sought at Reception/Front Office or the Main School Office.
- 3.2 Except in the case of a very minor injury, a child should not be sent to the Medical Room unaccompanied. The sick child should usually be accompanied by another child who should be instructed to report back to the relevant teacher to confirm that the Medical Room Team has been found. EYFS and Pre-Prep pupils are not sent, but taken, to the Medical Room, by a member of staff.
- 3.3 There is a telephone just inside the door to the Senior Boys' Changing Rooms which may be used to contact the Medical Room Team quickly (213).
- 3.4 An injured child or adult who is fit to be moved should be taken to the Medical Room. If the casualty is not fit to be moved, then the Medical Room Team must be summoned to attend as soon as possible. A member of games staff should carry a walkie talkie on match days in order to be able to contact the School Nurse on channel 1 if they are required to attend an injured pupil pitch-side.
- 3.5 Accidents which require a first aid response should primarily be referred to the Medical Room Team, unless assessed to be minor in severity, and so able to be dealt with by a First Aid trained member of staff if they are already at the scene. Accidents which are caused by problems with the school environment (i.e. trip hazard) need to be reported in the relevant Accident Book within the Medical Record and drawn to the attention of the Head of Operations so that Health & Safety implications may be considered, and reports be made by the Head of Operations under RIDDOR (reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013) as necessary (see 3.15).
- 3.6 Injuries and illnesses are recorded by the Medical Room Team in the "Daily Record Book" and digitally in the Medical Centre section of iSAMS. If the child is sufficiently unwell to return to normal activities, parents should be contacted and they may collect the child.
- 3.7 In cases of serious injury the Medical Room Team will inform the Head, or in her absence the Deputy Head in the first instance. Parents/Guardians should be informed as soon as possible.

- 3.8 If this is obviously an emergency, send a runner to the Reception Office/Main School Office/Bursary to call for an ambulance; make sure the runner knows the age of the person and exact injury and where they are. The runner should report back to let staff know that the ambulance is on its way. The casualty should be kept still and warm.
- 3.9 If there is a suspicion that a pupil needs an x-ray, parents should be informed as soon as possible and attend A & E with their child as required.
- 3.10 If an ambulance is called and parents are not present, a member of staff should go with the pupil and take their medical notes, mobile phone and cash for taxi back to school; parents should be informed as soon as possible.
- 3.11 If the child is subsequently to be looked after at School, instructions given by Accident and Emergency staff should be followed and communicated to parents on collection. Progress should be recorded in the Daily Record Book/Pupil Notes on iSAMS Medical Centre and parents kept informed of the pupil's progress.
- 3.12 All notes of visits to the medical room are recorded in the Daily Record book and on iSAMS Medical Centre. Significant medical updates are stored in the student files in the locked filing cabinets in the medical room.
- 3.13 For more serious incidents, an entry in the Accident Book should also be considered in cases where a pupil, visitor or member of staff has sustained an injury at school or in a school activity off site. In case of doubt, seek the advice of the Head of Operations.
- 3.14 It is the responsibility of the Medical Room Team to exercise judgment and to inform parents in cases of illness or accidents as appropriate. It is of note that significant head injuries should always be reported to parents whether by phone, email, or the child being sent home with Surrey's "Head Injury in Children and Young People" leaflet (2015).
The School follows the advice set out by the Rugby Football Union (RFU) with reference to the HEADCASE programme. HEADCASE is also a reference point for concussion awareness training and continued professional development by staff.
- 3.15 The Head of Operations will inform the Health & Safety Executive of serious injuries, communicable illnesses and 'near misses' which warrant reporting under RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013).
In the event of a serious injury, any member of staff should act without hesitation to call for an ambulance. An emergency call may be made from any of the school telephones by pressing '999' or '112'.

4. Off-Site Activities

- 4.1 A mobile first aid kit is taken on school trips and sporting activities.
- 4.2 Trip organisers for overnight residential trips are responsible for sending home Medical Questionnaires as part of the risk assessment. Completed questionnaires should then be reviewed by the Medical Room Team. Lists of students going on day trips, matches and residential trips should be given to the Medical Room Team in good time to allow them to review medical conditions based on the annual medical questionnaire. Staff in charge of residential and day trips are then advised of any

medications that may need to be taken, relevant precautions, background information and up to date medical information. A list of medical conditions is attached to risk assessments for school day and residential trips.

- 4.3 Trip organisers are responsible for ensuring that any injury or illness on an educational visit is reported to parents and the Medical Room Team. A record of the incident should be documented on an Incident/Accident form at the time and recorded and signed in the Daily Record Book located in the Medical Room. A note must also be entered in the pupil's medical record on iSAMS Medical Centre by the School Nurse.

5. Record Keeping:

5.1 Accident Records

Accidents, illnesses and medicines dispensed (see notes below) are recorded in the Daily Record Book in the Medical Room and/or in iSAMS Medical Centre. The Pre-Prep Department also has a Daily Record Book which is reviewed by the Medical Room Team. Medical Room staff are responsible for the daily upkeep of the Record Book and Pupil Notes on iSAMS Medical Centre. If accidents are deemed serious and/or have involved the fabric of the school these accidents must be reported to the Head of Operations and entered into the Accident Book in the Bursary. The Head of Operations will take further Health and Safety action as required which may involve reporting incidents under the provisions of RIDDOR.

- 5.2 Entries in the Daily Record Book/Pupil Notes on iSAMS Medical Centre require the full name of pupil, time of injury/illness, how it happened, nature of injury/illness and any treatment given; this must be initialed. Relevant staff will be informed as necessary, especially if a child may miss lessons. For EYFS pupils, parents will be informed by telephone or email of any significant (as judged by the School Nurse) accident or injury sustained by the child on the same day, or as soon as reasonably practicable, and any first aid treatment given. A "Record of Medical Room Attendance" form will also be completed and sent home with the pupil when appropriate to notify parents of medication administered, or of significant injury.

5.3 Pupil Medical Records

All parents are asked to complete a medical Form on admission to the School and are asked to update this as relevant depending on new medical/health developments. Long term medical conditions and allergies are communicated to staff as per 1.6. A separate Asthma register is in place including a list of children with parental consent to access the School's 3 spare/emergency salbutamol inhalers (stored in the Medical Room, Staff Room and Ness Hall). A register of students carrying adrenaline pens for severe allergies and with consent to access the School's 3 boxes of spare/emergency auto adrenaline injectors (stored in the Medical Room, Staff Room and Ness Hall) also exists and is maintained by the School Nurse. Pupils with specific medical conditions will have an Individual Health Care Plan providing full details, and the School's separate policy on *Supporting Pupils at School with Medical Conditions* refers.

6. Long Term Conditions

The School aims to enable pupils with long-term conditions to participate fully in all school activities and ensure they are not disadvantaged by their condition. Pupils are encouraged to take responsibility for managing their medication and condition. Where possible, pupils are expected to carry life-saving medication with them at all times.

Parents are encouraged to provide the School with spare medication which is located in the Reception/Medical Room. The Medical Room Team monitors expiry dates of medication and sends reminders home – it is the overall responsibility of the parent to provide and ensure all medication is in date.

6.1 Adrenaline Auto Injectors (AAI's)

Pupils who require an AAI are encouraged to carry one with them at all

times. Pre-Prep teaching staff are responsible for individual pupil emergency medication bags during the school day and these should accompany the pupil at all times.

Pupils who may require the use of an AAI in an emergency are identified as per 1.6.

In addition to the AAI carried by the pupil, a spare AAI for each pupil must be available in an emergency and is kept in Reception/Front Office.

Teaching staff receive training in how to use AAIs via First Aid courses and refresher training by the Medical Room Team. Staff requiring updating of training or additional information should refer to the Medical Room Team. If an AAI is administered, an ambulance must be called, and parents alerted as soon as possible. The School Nurse, Head of Operations and Head should also be informed, if not present at the time of administration.

Please see the School's guidance on Allergies and Anaphylaxis available via the School Nurse in The Medical Room.

6.2 Asthma

An Asthma Register, listing all pupils diagnosed with Asthma, is in place and available for staff to view as per 1.6, including consent for access to the spare/emergency salbutamol inhalers for those who meet the criteria.

Pupils are expected to carry one inhaler with them at all times. Spare named inhalers are located in the Medical Room. Pupils are encouraged to attend annual Asthma Reviews via their GP surgery, and parents are encouraged to complete a School Asthma card for their child each year to form the basis of their child's Individual Health Care Plan.

Please see the School's guidance on Asthma available via the School Nurse in The Medical Room.

6.3 Diabetes

Please see the School's guidance on Diabetes available via the School Nurse in The Medical Room.

6.4 Epilepsy

Please see the School's guidance on Epilepsy available via the School Nurse in The Medical Room.

7. Protocol for the Storage/Dispensing of Medication:

7.1 Over the Counter Medicines (OTCM)

All OTCM are given to Pupils at the discretion of the Medical Room Team. The School holds consent forms for each pupil for the consent to administer OTCM, although it is good practice to seek parental permission prior to administration if possible and to confirm whether the child has had any medication prior to attending school. These medicines are recorded in the Daily Record Book, iSAMS medical

centre, and Medication Log stating time, dosage and reason for administration; this must be signed by the person giving the medication and parents informed either by phone, email, or “Notice of Medical Room attendance” given to the child to take home and give to parents.

These medicines are locked in the medicine cupboard at all times.

Note (Aspirin is not kept on the premises as it is not to be dispensed to children under the age of 18 years).

7.2 **Named/Prescribed Medication**

When a pupil is prescribed medicine such as antibiotics, and it is deemed appropriate by parents for the child to attend school, the medication is administered by the Medical Room Team at a time agreed between the parents and the School Nurse. It may be deemed reasonable for medication administration to be timed to fit during school break times if minor regime adjustments can be made to allow this in order to avoid disruption to the child’s learning, whilst still bearing in mind the prescription advice from the relevant doctor.

These medicines must be in the containers used by the pharmacy with the child’s name, dosage and frequency on it, or with patient information leaflet enclosed. A Medical Administration Consent Form must be completed by parents advising the School Nurse for the need and frequency of the medication. (Forms are held in Reception or are available from the School Nurse and can also be found in “The Medical Room” area of the School website).

Named medication is kept locked in a separate cupboard with the name of the pupil clearly labeled on the medication.

7.3 **Controlled Drugs**

Where a controlled drug is prescribed for a child, the School may administer the drug in accordance with the prescriber’s instructions.

Any prescribed controlled drug will be stored in a locked non portable container.

Only the Medical Room Team will have access to the CD cupboard in the medical room, or first aid trained staff on residential trips when necessary (a full handover is given by the medical room team to trip staff if this applies).

A second CD cupboard is located in the Pre Prep department for storage of CD medications for pupils in EYFS and Pre Prep. Pre Prep staff with relevant training are given access to this cupboard to allow administration of controlled drugs to pupils in EYFS and Pre Prep by Pre Prep staff at a time agreed with parents.

A controlled drugs book is used to record quantity and administration of such drugs for audit and safety purposes. Two staff members must check and sign for controlled medication upon receipt and when administering. If Gillick competence/Fraser Guidelines are met, a senior school child may counter sign the controlled drug book for their medication with the School Nurse. See this link for more information:

<https://learning.nspcc.org.uk/child-protection-system/gillick-competence-fraser-guidelines>

7.4 **Staff Medication**

Staff must seek medical advice if they are taking medication which may affect their ability to care for children and any staff medication must be securely stored at all times. The School’s Smoking Alcohol and Drugs Policy and the Staff Code of Conduct contained in the School’s Employment Manual refers.

8. Infection Control

The School implements such measures that are deemed necessary to prevent the spread of infections within the School community.

8.1 In the event that a pupil(s) become infected, the School reserves the right to exclude the pupil(s) for a period considered appropriate for that particular infection, as recommended by UK Health Security Agency (previously Public Health England) in their publication '*Health Protection for Schools, Nurseries and other childcare facilities.*' A copy of this publication is available in the Medical Room and at Reception. The exclusion period recommended by UKHSA is a guide and the School reserves the right to extend this period if considered appropriate.

8.2 Single use disposable gloves are available in First Aid kits. Staff are reminded of the importance of observing good hygiene: all staff should take precautions to avoid infection and must follow basic hygiene procedures. Staff should take care when dealing with blood or other body fluids and disposing of dressings or equipment. Small yellow clinical waste bags, located in classrooms/mobile First Aid kits, should be used to dispose of clinical waste. The bags should then be placed in the large clinical waste bin located in the Medical Room. Body fluid spillages should be reported to the domestic staff for cleaning and hygiene purposes. Staff or student toilets that have been contaminated by reported incidents of vomiting and/or diarrhoea will be closed (a "closed" for cleaning sign or similar notice will be left outside the toilet as soon as possible after the incident occurs) until sanitised by the domestic/cleaning staff to reduce risk of cross-infection. As per UKHSA Guidelines, staff and students with vomiting and/or diarrhoea are asked to adhere to the 48 hour school exclusion rule. (They are not to return to school until at least 48 hours after the last episode of either vomiting or diarrhoea).

8.3 Infection Control during the Coronavirus/Covid-19 Pandemic

Covid 19 first emerged at the end of 2019, and subsequently Duke of Kent School adhered to emerging government guidance, which adapted frequently as the pandemic developed through 2020 to 2022. Extra measures included school closure and remote learning, Covid 19 mass testing of senior pupils and staff, enhanced hygiene procedures, immunisations were delivered to relevant school-aged children, and isolation rules and test and trace rules adhered to. In April 2022, however, the UKHSA published its latest guidance entitled "Living safely with respiratory infections, including COVID-19". This brought an end to free public access to Covid 19 testing (whether lateral flow or PCR) and the need to track confirmed positive cases.

It is acknowledged that Covid 19 continues to circulate in the UK community, but the government currently advises that it should be managed as any other respiratory infection. This is possible because the roll out of the Covid 19 immunisation programme has raised levels of immunity across the UK population; meaning Covid 19 infection causes less cases of hospitalisation and death than when the pandemic first emerged. We therefore are no longer tracking cases or advising specific isolation times at Duke of Kent School. We do not require pupils with symptoms of respiratory illness to test for Covid 19 or to report results to school if they choose to test at home. Remote learning for pupils in Covid 19 isolation is no longer a government requirement. The school continues to encourage the school community to take advantage of the Covid 19 Immunisation programme as relevant.

Infection Control Measures with regards to all Respiratory Infections (including Covid 19) at Duke of Kent School include:

8.3.1 Minimising contact with individuals who are unwell by ensuring that those who are unwell with a fever of 37.8 or higher do not attend school. Staff and pupils who are feeling unwell with respiratory symptoms (frequent sneezing, cough, runny nose, fatigue, aches) are similarly encouraged to rest at home until symptoms improve enough to be able to tolerate a day at school.

8.3.2 Cleaning hands often and thoroughly - students and staff are asked to wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or to use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered at frequent intervals throughout the day (arrival, before and after eating, after exercise, using toilets, after sneezing/coughing).

8.3.3 Ensuring good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach, or asking people to cough/sneeze into the inside of their elbow if a tissue is unavailable. Bins will be emptied regularly throughout the day. Pupils and staff will also be encouraged not to touch their nose, mouth or eyes. Where possible, doors and windows will be left open to improve ventilation and opportunities will be taken for outdoors learning and breaks.

8.3.4 Cleaning frequently touched surfaces often using standard products, such as detergents and bleach.

8.3.5. Ventilation reduces the risk of transmission of respiratory illness. As such, classroom windows will be opened at Duke of Kent School when this does not risk the discomfort of pupils and staff by unreasonably lowering the ambient temperature of a classroom.

8.3.6. Immunisation Nasal Flu immunisations are to be offered to pupils with parental consent from years Reception through to Year 11 in October 2024 at Duke of Kent School in accordance with the school age immunisation service programme. Covid 19 immunisations are not planned to be delivered through schools this academic year, but parents are able to seek advice from the school nurse with regards to how to book Covid 19 immunisations from the NHS for 5+ year olds.

9. Special Arrangements for EYFS and Pre-Prep

All arrangements apply as above, however:

EYFS and Pre-Prep pupils are not sent, but taken, to the First Aid Room, by a member of staff, if deemed necessary, (see 1.5) otherwise will be looked after by First Aid qualified EYFS/Pre-Prep staff and a suitable note will be made in the Daily Record Book held in the Pre Prep Department. Staff in the EYFS and Pre-Prep are asked to complete a two day (blended online/classroom) Paediatric First Aid Course. This has been completed September 6th 2022 and qualification lasts for three years. We plan to renew this qualification in April 2025.

Appendix A

Staff First Aid Qualifications

As of September 3rd 2024

- 1 Chloe Sarjant, **Lead School Nurse** BSc RGN, **Paediatric First Aid** (2 day) Exp September 2025
2 Maya Garside, **School Nurse** RGN, **Emergency First Aid at Work** Exp 21/04/2027

The following members of staff hold: **First Aid at Work** (3 day)

- 3 Graham Herbert **Expires 8th September 2024 - renewal booked for 23rd Sept 2024 (blended) at Hollingbury (Brighton)**
4 Benjamin Monk Expires 25th April 2027

The following staff member holds: **Emergency First Aid at Work** (1 day) - Expires 29th Sept 2027

Paul Aves - booked to attend 30th September 2024 (Guildford)

The following staff member holds: **First Aid course** (1 day) - details TBC

Connor Hewitt - awaiting copy of certificate

The following members of staff hold: **Paediatric First Aid** Expires September 2025

- 5 Lisa Walpole
6 Gill Crabtree
7 Michele Ragless (see also below)
8 Hannah Munro
9 Penny Henry (see also below)
10 Chris Wright
11 Sarah Harris
12 Nicole Richmond
13 Becky Salley
14 Samantha Plumbridge
15 Rebecca Green

The following members of staff hold: **Forest School/Outdoor First Aid**

Michele Ragless Surrey First Aid "Combined outdoor forest school first aid with paediatric" 8th & 9th May 2024 EXP 7th May 2027

16 Sam Gritton Remote Outdoor First Aid (two days) Surrey First Aid Training **EXP**
16th March 2025

The following members of staff hold: **Forest School/Paediatric First Aid/Emergency First Aid at Work/Outdoor First Aid “ELST”**

Penny Henry (2nd qualification) Trained 5th & 6th June 2024 **EXP 4th June 2027**

The following staff hold: **Schools First Aid (including AAI administration) Expires 26th Jan 2026**

17 Josie Vickers (now Josie Monk)

18 Jacqui Browning

After 3rd Sept 2024 St Johns Ambulance training at school, the following staff will hold: **Schools First Aid (including AAI administration) Exp 2nd Sept 2027**

19 Damian Allen

20 Andrew Boden

21 Roger Brecke

22 Laura Fellous

23 Emily Francis - Maternity leave currently (to attend as a KIT day)

24 Sarah Gritton

25 Sam Honey

26 Jane Hopwood

27 Dale Lodge

28 Polly Nicholson

29 Fiona Punter

30 Nick Rye

31 Alex Seeley

32 Tom Southee

33 Gillian Tattan-Robb

34 Mike Watson

35 John Wilson

36 Adam Wyllie

37 Mariette Douglas

38 Kelly Gourlay

39 Matt Green

40 Tom Kaye

41 Caitlin Allsop

42 Frankie Turnbull

43 Emma Woolgar

44 Helena Everill

45 Charlie Kulcyk

46 Peach Southee

47 Helen Ward

48 Ellen Vermeulen

49 Rachel Dann

50 Pippa Tuite

51 Belinda Rigby

52 Pam Ioaniddes

53 Caroline Nicholson

54 Jenni Wilkinson

The following staff holds: **Schools First Aid (including AAI administration) Expires 22nd Apr 2027**

55 Graeme East (bus driver)

The following staff attended Swimming Pool LifeGuard training 7th Sept 2023 (**Expires 6th Sept 2025**)

Ellen Vermeulen (2nd qualification)

Graham Herbert (2nd qualification)

Josie Monk (2nd qualification)

Rachel Dann (2nd qualification)

The following staff hold: **Emergency First Aid for Work** “School specific training” Surrey First Aid **EXP 8th Oct 2027**

56 Don Booker

57 Richard Hearn

58 Robert Davis

The following staff are **Youth Mental Health First Aiders**:

- Tom Southee
- Ali Lock
- Sue Knox (June 2019)
- John Wilson (June 2019)
- Rebecca Green (June 2019)
- Alex Seeley (June 2019)
- Caroline Instone (June 2019)
- Chloe Sarjant (June 2019)
- Chris Wright (June 2019)
- **Emily Francis (January 2023) Maternity leave currently**
- Matt Green (January 2023)
- Frankie Turnbull (January 2023)
- Adam Wyllie (January 2023)
- Andrew Boden (January 2023)
- Peach Southee (January 2023)
- Laura Fellous (January 2023)
- Ellen Vermeulen (January 2023)
- Fiona Punter (January 2023)
- Dale Lodge (January 2023)
- Mike Watson (January 2023)
- Damian Allen (January 2023)
- Emma Coackley (January 2023)
- Gillian Tattan-Robb (January 2023)
- Nicola Rowley (January 2023)
- Mariette Douglas (January 2023)

The following staff have completed the “Care of Children and young people with Type 1 Diabetes” competency workbook January 16th 2020 (trainer: Diabetes Nurse Specialist Cheryl Hall):

- Chloe Sarjant
- Graham Herbert
- Emily Francis
- Dale Lodge
- Adam Wyllie
- Ellen Vermeulen
- Sam Honey

Total number of DoK First Aiders: 58

Registered Nurses: 2,

First Aid at Work (3 day) Qualified: 2

Emergency First Aid at Work (1 day): 6 (3 are bus drivers)

Paediatric First Aid Qualified: 12

Forest School/Outdoor First Aid Qualified: 3

Youth Mental Health First Aid: 24
